Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 11, 12 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Jackson.

There is disclosed in Jackson a baking pan, comprising: a food contacting surface formed with an embossed textured pattern comprising a plurality of spaced apart raised, straight sided geometric shapes (diamonds, squares) 12 separated by a first set of parallel depressed grooves 11 and a second set of parallel grooves 11; and an exterior surface formed with an embossed textured surface pattern comprising a plurality of spaced apart depressed, straight sided geometric shapes separated by raised ridges, each of the shapes and ridges being the opposed side of the shapes and grooves in the food contacting surface.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1761

Claims 7-10, 13-17 and 19-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jackson in view of Doyle et al.

Doyle discloses that it is known in the art to provide an anodized pan outer an inner surface and a non-stick coating on the inner surface.

It would have been obvious to one skilled in the art to modify the pan of Jackson with that taught by Doyle and provide an anodized surface, in order to extend the life of the baking pan.

It would have been obvious to one skilled in the art to provide the food contact surface of Jackson with a non-stick coating as taught by Doyle, in order to prevent damage to the baking pan during cooking.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Burnette, Bramberry, Candianides and Welhouse are cited for their disclosure of the state of the art.
